

➤ WordMailMerge for MS CRM 3.0

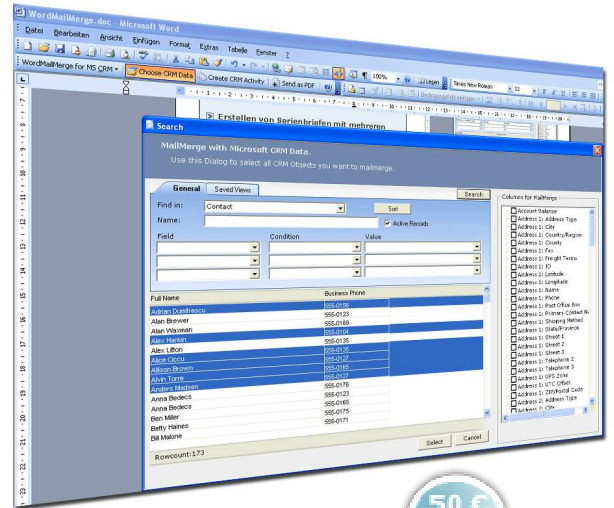

This add-on provides an comfortable and efficient integration of MS Word into MS CRM.

WordMailMerge provides following possibilities:

- Make mail merge in MS Word with many records.
- Make a mail merge with one record directly out of the web client.

With WordMailMerge ist possible to generate a letter or e-mail template with data from a contact or account, directly out of the web-client.

e.g data from oportunitites or quotes could be integrated in predefined Word-templates easily.

As our add-on is completely integrated in MS CRM its very easy to use a quote (inclusive all data) to generate a Word document.

Finally the generated document will be saved back into the CRM-system (attached) and could be send to customers as a pdf-document (e.g. send quote as e-mail).

The user himself leaves CRM just to personalize the Word-document.

WordMailMerge is licensed per user.
