GroupCalendar Server for Microsoft Dynamics CRM 2011 Readme

April 2013

This document provides important, late-breaking information about the GroupCalendar Server for MS Dynamics CRM 2011.

Migration notes [Important]

Please make sure you have read the Microsoft Implementation Guide carefully.

As described in the following sections, we do recommend to get in touch with us regarding an upgrade of our add-ons to CRM 2011:

- http://download.microsoft.com/download/0/C/2/0C288CFB-E272-4F31-B48A-1BA05DC738C4/Microsoft_Dynamics_CRM_2011_IG.zip

"Microsoft Dynamics CRM 2011 Implementation Guide.chm" chapter "What happens to ISV solutions" or "Microsoft Dynamics CRM 2011 Planning Guide.doc" chapter "What happens to ISV solutions"

- http://blogs.mscrm-addons.com/post/2011/05/23/Upgrading-CRM-4-to-CRM-2011-with-3rd-party-addons.aspx

As a general rule, all our products **must** be uninstalled before migrating from a previous version of CRM. By leaving the old version in place you might end up with non-functional remains of the previous UI customizations.

If you chose not to uninstall our product any afterthought removal of the migrated items by us **is not covered** by the support and maintenance contract and will be invoiced.

If you are in doubt, please contact us before uninstalling or migrating to ensure a transition process as smooth as possible.

Documentation

All available documentation can be downloaded here: http://www.mscrm-addons.com/Support/Documentations/tabid/116/Default.aspx

License

The product comes with a 14-day trial license.

Installation Notes

You have to install the **GroupCalendar Server for Microsoft Dynamics CRM 2011** on your Microsoft Dynamics CRM 2011 Server.

During the installation, you have to specify at least one organization in which the GroupCalendar Server will be installed. After the setup is completed, you could start the GroupCalendar Server Configuration in the Windows Start-menu to install and configure the GroupCalendar Server for another CRM organization.

In an **On-Premise** environment, you have to install the "Server Part" on the CRM Server.

Uninstall

If you want to completely uninstall the GroupCalendar Server for Microsoft Dynamics CRM 2011 for all CRM organizations, just start the uninstall routine through Windows Programs and Features.

If you want to uninstall the GroupCalendar Server for Microsoft Dynamics CRM 2011 for one specific CRM organization, launch the GroupCalendar configuration and remove the product from the desired organization:

Documentation Feedback

We welcome your suggestions and comments about the documentation. You can quickly and directly send e-mail feedback to support@mscrm-addons.com . All feedback must be in English or German. Your feedback will be used to make improvements to the content.

Known Issues

- Selecting any nav-item entry in CRM entities might freeze the ribbon until you reselect a CRM link in the nav-bar.
