Sales Report (Awesome Company, Inc.)
2022 Recap
- 2023 Projections

1. Design your templates in Microsoft Word

Easy, intuitive and powerful. No programming skills required.

2. Generate & deliver documents

Just a simple click, directly from the CommandBar.

3. Automate your documents

Connector with 25+ actions for Power Automate.

Template Design

Design dynamic and professional document templates using the powerful features of Microsoft Word supporting advanced filtering, sorting and repeating tables. No programming skills required!

Connector

Our Connector supports more than 25 actions to be used in Flows or Canvas Apps, including: creating a document, printing, saving to SharePoint, attaching to a note or email, and many more.

E-Signature

Seamless integration with e-signature solutions like DocuSign, AdobeSign and AssureSign, which permit the configuration of e-signature fields directly in the templates and initiate e-signature processes.

SharePoint

Automatically save documents to the appropriate location in SharePoint, including the ability to automatically create folders and dynamic save locations.

Printing

Documents can be printed via local, network and cloud printers.

One-Click-Actions

Streamlining of document processes by combining multiple actions, like “create, send by email and save to SharePoint,” into a single, predefined command.

All features and support included

“ We embed DocumentsCorePack into our Power App as a replacement for the native Word template and SSRS report writer. Our use cases include documents like invoices, order forms, proposals, and status reports. DocumentsCorePack has powerful features and is easy to embed. mscrm-addons.com gives us the solution we need to be successful. Their support, live chat, knowledge base and videos are immensely helpful ”

Marc DiGiorgio, Managing Director (TekStack)
