

DOCUMENTSCOREPACK ON-PREMISE

Professional document automation
without moving to the cloud

When cloud-based solutions are not an option, DocumentsCorePack On-Premise gives organizations the flexibility to automate document processes while keeping everything where it belongs: within their own infrastructure. Create quotes, contracts, invoices, letters, and more directly from Microsoft Dynamics 365 using familiar Microsoft Word templates, while meeting your internal IT, security, and compliance requirements.

Built for organizations that need control

Many organizations have strict requirements around where data is stored, how systems are managed, and when updates are applied. DocumentsCorePack On-Premise fits into your existing IT landscape and provides powerful document generation and automation without changing your established processes.

Keep sensitive data where you need it

Your documents and business data stay entirely within your own infrastructure

Full control over updates and infrastructure

Decide when to update your system and manage it according to your own IT policies

No dependency on cloud services

Keep document generation running without relying on external cloud platforms

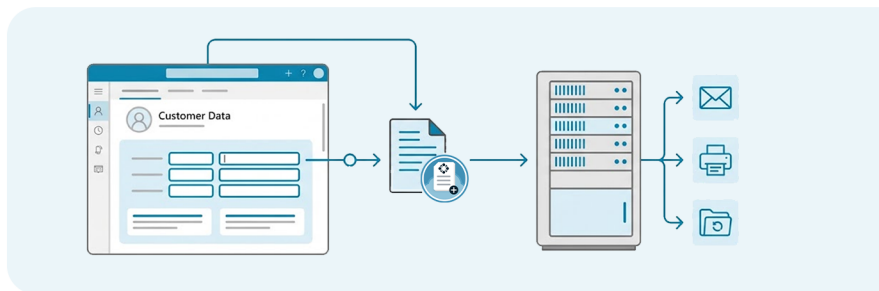

Fits existing Dynamics 365 On-Premise environments

Integrates seamlessly into your current Dynamics 365 On-Premise deployment with no disruption

Professional document processes in your own environment

DocumentsCorePack On-Premise connects directly with Microsoft Dynamics 365 to automate everyday document processes. Create flexible document templates in Microsoft Word and generate professional quotes, contracts, invoices, and more in seconds using accurate CRM data.

Enterprise document automation with complete control

Organizations need efficient document processes without compromising on security, governance, or infrastructure requirements. DocumentsCorePack On-Premise helps you automate document creation while keeping your environment, data, and processes under your control.

Save Valuable Time

Generate documents directly from Dynamics 365 instead of manually collecting information and formatting documents.

Ensure Consistent Quality

Deliver professional, standardized documents across your organization. Predefined Word templates ensure every quote, contract, invoice, and report follows your corporate guidelines.

Reduce Errors & Rework

Create documents based on accurate Dynamics 365 data instead of manual input. Minimize mistakes, avoid unnecessary corrections, and improve reliability.

Aligns with your IT Strategy

Deploy DocumentsCorePack on-premises or in your own Azure cloud. Maintain control over your infrastructure while meeting your organization's security, compliance, & governance requirements.

Reliable document processing at any scale

From single documents to large-scale document runs, DocumentsCorePack On-Premise ensures your document processes stay fast, reliable, and fully under your control.

- ✓ Automate document creation, emails, printing, and workflows
- ✓ Process high volumes without slowing down daily operations
- ✓ Manage and monitor document services in your own environment
- ✓ Scale processing capacity for growing business needs
