

AMBIT GROUP

Partner Success Story

“Our partnership with mscrm-addons.com is built on a shared commitment to delivering real value to our customers. Their innovative solutions seamlessly extend Dynamics 365 CE and the Power Platform, enabling organizations to automate document processes efficiently. Together, we empower businesses with scalable, cost-effective, and future-proof solutions.”

About Ambit Group

Ambit Group is a leading partner for digital transformation, specializing in Customer Experience, CRM, Custom Digitalization, and ERP. Our mission is to empower companies and organizations to become the best version of themselves. We rely on the Microsoft Platform for Business Applications - including Dynamics 365, the Power Platform, and Azure capabilities - as our technological foundation. But technology alone is not enough. Our true strength lies in our consulting expertise: helping customers find the right balance between people, organization, and processes to ensure sustainable and effective use of digital solutions. Our promise: We make your ambition work.

Why did you choose mscrm-addons.com as a partner?

We have been successfully working with mscrm-addons.com for many years. From the very beginning, we appreciated their focus on excellent solutions that provide our customers with immediate and significant value. Their applications are well-designed and technologically advanced. Continuous investment in new features and close partner support are further key aspects of this strong partnership.

How has partnering with mscrm-addons.com impacted your organization?

With the products from mscrm-addons.com, we close critical functional gaps in CRM / Dynamics 365 CE and the Power Platform, especially in document generation and automation. This gives us a significant competitive advantage over other providers and technologies. The solutions are cost-effective, easy to use, and seamlessly integrate into customer environments. Our experts in consulting and implementation ensure high adoption and maximum value for our clients.

What are the main benefits for your customers regarding our solutions?

With these solutions, customers can make much more use of their data in CRM or the Power Platform. A wide variety of documents - such as contracts, confirmations, personalized brochures, and thank-you letters - can be generated and processed directly. Both we and our customers are impressed by the high level of customization and the ability for users to work independently after thorough training. These solutions make Dynamics 365 CE and Power Apps an even more integral part of the customer's application landscape.
